How do geysers work?

Clepsydra Geyser

The Upper Geyser Basin of Yellowstone National Park has the largest concentration of geysers in the world. Geysers are hot springs with narrow spaces in their plumbing, usually near the surface. These constrictions prevent water from circulating freely to the surface where heat would escape. The deepest circulating water can exceed the surface boiling point (199°F/93°C).

The surrounding pressure also increases with depth, similar to the ocean. Increased pressure exerted by the enormous weight of the overlying rock and water prevents the water from boiling.

As the water rises, steam forms. Bubbling upward, steam expands as it nears the top of the water column until the bubbles are too large and numerous to pass freely through the constrictions. At a critical point, the confined bubbles actually lift the water above, causing the geyser to splash or overflow. This decreases pressure on the system, and violent boiling results. Tremendous amounts of steam force water out of the vent, and the eruption begins.

Water is expelled faster than it can enter the geyser's plumbing system, and the heat and pressure gradually decrease. The eruption stops when the water reservoir is exhausted or when the system cools.

Yellowstone's geyser basins contain fountain-type geysers and cone-type geysers. Fountain-type geysers, like Clepsydra (left), shoot water out in various directions from a pool of water. Cone-type geysers erupt in a concentrated jet of water from inside a rock formation.

Visitor centers

Albright Visitor Center

Located at Mammoth Hot Springs and open daily, year round, the center offers new wildlife and history exhibits, a bookstore, trip planning, daily ranger programs, and the park's only **free Wi-Fi**.

Open daily 9 AM–5 PM
Call 307-344-2263

Canyon Visitor Education Center Lobby

Information and vending is available during open hours, restrooms are available 24 hours a day.

Opens for the winter season beginning 12/15/16
Open daily 9 AM–3 PM
Call 307-344-2550

Old Faithful Visitor Education Center

Visit dynamic exhibits about hydrothermal features, and regular ranger programs. Geyser eruption predictions are posted, or call 307-344-2751 for anticipated times.
