

# Welcome to Yellowstone

WINTER IN YELLOWSTONE MEANS FEWER crowds, cold temperatures, and steaming geyser basins. Skis, snowshoes, snowcoaches, and snowmobiles become the main modes of transportation as roads close, rivers and lakes freeze, and winter storms blanket the park with snow.

## STAY ALERT IN THERMAL AREAS

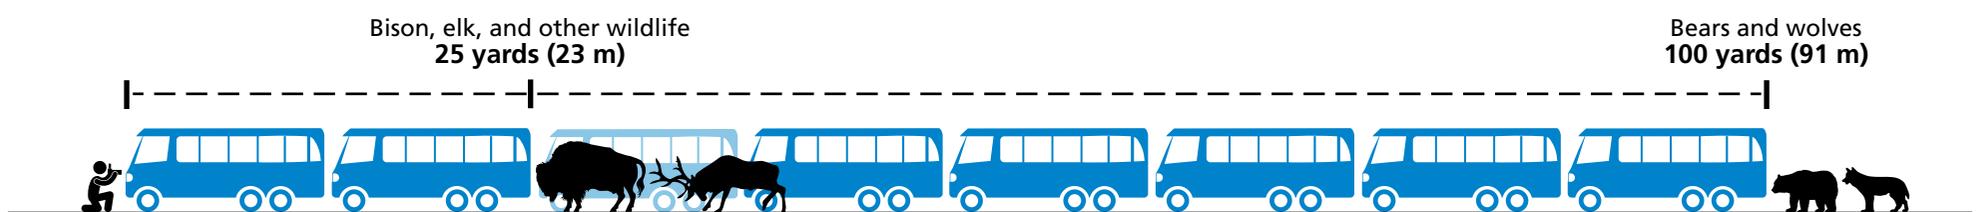

Hydrothermal features are evidence of an amazing fact: Yellowstone sits above a giant supervolcano. If you travel the 50 miles (80 km) between Mammoth Hot Springs and Old Faithful, you will see travertine terraces, acidic thermal features at Norris Geyser Basin, mudpots and fumaroles at Fountain Paint Pot, plus beautiful hot springs at Biscuit and Black Sand basins near Old Faithful.

- **Stay on boardwalks and designated trails.** The ground is unstable in hydrothermal areas. Use caution, as boardwalks are often covered in snow and ice.
- **Keep hands out.** Water in geysers and hot springs can severely burn you.
- **Keep litter out of the pools.** Protect Yellowstone's hydrothermal features by never throwing any objects into them.

Breaking ski trail in Gardners Hole.

## Enjoy watching Yellowstone's animals but **STAY SAFE**. They are **WILD** and **DANGEROUS**.

## COVID-19 Precautions

The National Park Service follows CDC guidance to reduce the spread of COVID-19. Check locally, on the park website, and in the park apps for updates and changes in park operations. Thank you for helping to keep yourself and others safe and healthy.

**Masks are required for everyone, regardless of location or vaccination status, in all NPS buildings, crowded outdoor spaces, and all forms of enclosed public transportation.** Additional details are available at [www.nps.gov/coronavirus](http://www.nps.gov/coronavirus).

Mask requirements may vary due to updated CDC guidance.

For the most up-to-date information on mask requirements during your visit, check locally, and follow all posted signage.

Wash your hands with soap and water for at least 20 seconds, or use hand sanitizer. Cover your mouth and nose when you cough or sneeze. If you feel sick, do not visit the park.

## Keep Wildlife Wild

Winter is a wonderful time to view wildlife. All the large mammals present when Yellowstone became a park in 1872 are here today: grizzly and black bears, wolves, mountain lions, elk, bison, pronghorn, moose, and bighorn sheep.

- **Wildlife are dangerous.**
- **Do not approach, encircle, follow, or feed any animal.**
- **Bison, bears, and elk injure and kill people.**
- **Stay at least 100 yards (91 m) from bears and wolves.**
- **Stay at least 25 yards (23 m) from all other animals, including bison and elk.**
- **If an animal moves closer to you, move away to maintain a safe distance.**
- **Do not stop on or block a road.**
- **Use pullouts; stay in your car to watch animals.**
- **Store food and trash securely.** Backpacks and snowmobile gear bags are not secure.
- **Do not feed any animals, even birds and squirrels.**

Yellowstone National Park  
National Park Service  
U.S. Department of the Interior

**Emergency Information**  
Dial 911  
307-344-7381  
TTY 307-344-2386  
Park entrance radio 1610 AM

**Park Tip Line** 307-344-2132  
To report a crime or criminal activity. Leave as much detail as you can. Remain anonymous, or leave a name and number.

**Free National Park Service Apps**

Enrich your Yellowstone experience with one of two free, official apps: NPS Yellowstone or National

Park Service. Both apps provide self-guided audio tours, accessibility information, and detailed site and service information. Both allow you to download the content so you can use the app offline. The NPS Yellowstone app is the only one to offer live geyser predictions, live road statuses, and in-depth interpretive stories.

Follow @YellowstoneNPS

# Facilities and Services

## Medical Services

### Yellowstone emergency response and ambulance service

Call 911  
Text 911 is not available in Yellowstone.

### Mammoth Clinic (Medcor)

Medical care from emergencies to minor needs.  
307-344-7965

### Winter Hours

Monday–Thursday	8:30am to 5pm
Friday	8:30am to 1pm
Weekends, holidays	CLOSED

### Old Faithful Winter Clinic (Medcor)

January 7–8	8am to 4pm
February 25–26	8am to 4pm

Geysers Hill in winter.

## Accessibility

A **printed guide** with accessibility information is available at visitor centers and on the park website ([go.nps.gov/YELLaccess](http://go.nps.gov/YELLaccess)).

**Qualified service animals** are welcome throughout the park and in all park facilities. However, they must be leashed and under your control at all times.

## Heritage and Research Center

Located just beyond the North Entrance in Gardiner, Montana. This facility is **home to Yellowstone's museum collection, archives, and research library.**

### Open to Public

Monday–Friday 9am to 4pm

### Appointments necessary for research.

[YELL\\_Heritage\\_Center@nps.gov](mailto:YELL_Heritage_Center@nps.gov)

## Cell Service

**Cell phone service is very limited in the park and surrounding areas.** General cell coverage areas are marked on the newspaper park map (see back page).

**Emergency 911 service by cell phone is only available in coverage areas. Text 911 is not available in Yellowstone.**

During peak hours and periods of heavy visitation, **the cellular network may be very slow.** Your provider may or may not roam on networks in Yellowstone.

As a courtesy to others, **silence your mobile device** while enjoying Yellowstone.

## Wi-Fi

### Available for free:

- Horace M. Albright Visitor Center in Mammoth Hot Springs

## Lodging, Dining, and Tours

As one of Yellowstone's official concession companies, Yellowstone National Park Lodges offers **lodging, dining, and a variety of tours and activities.**

**For reservations and information,** ask at park hotels, or contact Yellowstone National Park Lodges:

Phone Same-Day Reservations Only 307-344-7901  
Other Advance Reservations 307-344-7311, 866-439-7375  
Online [YellowstoneNationalParkLodges.com](http://YellowstoneNationalParkLodges.com)  
Email [Reserve-YNP@Xanterra.com](mailto:Reserve-YNP@Xanterra.com)  
Mail PO Box 165  
Yellowstone, WY 82190

**A variety of winter activities,** including partial or full-day tours by heated snowcoach, snowmobile tours and rentals, and skiing and snowshoe adventures are available from a wide range of authorized guides. Learn more on page six or by visiting [go.nps.gov/YELLtours](http://go.nps.gov/YELLtours).

**Other facilities and services** may be available depending on current conditions. Learn more by inquiring locally or visiting [go.nps.gov/winterinyellowstone](http://go.nps.gov/winterinyellowstone).

## Developed and Backcountry Camping

### Mammoth Campground

Open year-round  
First-come, first-served in winter  
Sites may be limited  
\$25/night, 30 night maximum stay

Amenities include flush toilets and accessible sites. Generators are allowed 8am to 8pm.

### Overnight Backcountry Camping

A free permit is required to camp in the backcountry during winter.

For more information, contact the Central Backcountry Office:  
Phone 307-344-2160  
Online [go.nps.gov/YELLbackcountry](http://go.nps.gov/YELLbackcountry)  
Email [yell\\_backcountry\\_office@nps.gov](mailto:yell_backcountry_office@nps.gov)

A snowcoach at the Madison River.

# How Do Geysers Work?

THE UPPER GEYSER BASIN OF YELLOWSTONE National Park has the largest concentration of geysers in the world. Geysers are hot springs with narrow plumbing, usually near the surface. These constrictions prevent water from circulating freely to the surface where heat escapes into the air. The deepest circulating water can be even hotter than the surface boiling point of 199°F (93°C) at the elevation of Old Faithful Geyser (7,349 ft / 2,240 m), for example.

Pressure on hydrothermal waters increases with depth. Increased pressure exerted by the enormous weight of overlying rock and water prevents the deep water from boiling.

As hot water rises, the overlying pressure decreases, and the water can boil to steam. Bubbling upward, the steam expands as it nears the top of the water column until the bubbles can no longer pass freely through constrictions in the geyser's plumbing. At a critical point, the confined bubbles actually lift water lying above and cause the geyser to splash or overflow. The loss of overlying water further decreases pressure on the hot water below, and violent boiling results. Tremendous amounts of steam force water out of the vent, and the eruption begins.

During a geyser eruption, water is expelled faster than it can enter the geyser's plumbing system, so the heat and pressure gradually decrease. The eruption stops when the water reservoir is exhausted or when the system cools.

Old Faithful under a winter night sky.

# Pack Mentality

YELLOWSTONE NATIONAL PARK IS THE SITE OF one of the most ambitious and controversial wildlife restoration projects in the world. The Yellowstone Wolf Project has yielded more than two decades of discoveries on wolf behavior, predator-prey relationships, wildlife disease management, and ecological complexity.

The stark white backdrop of snow and the general absence of leaf cover make winter an ideal time to observe wildlife. From the popular overlooks of Lamar Valley, it is possible to get a glimpse of wolf society. You may even witness the dangerous dance of predators and prey as each struggles to survive.

See page five for more information about driving the Northern Range in winter and tips for safely capturing stunning photographs.

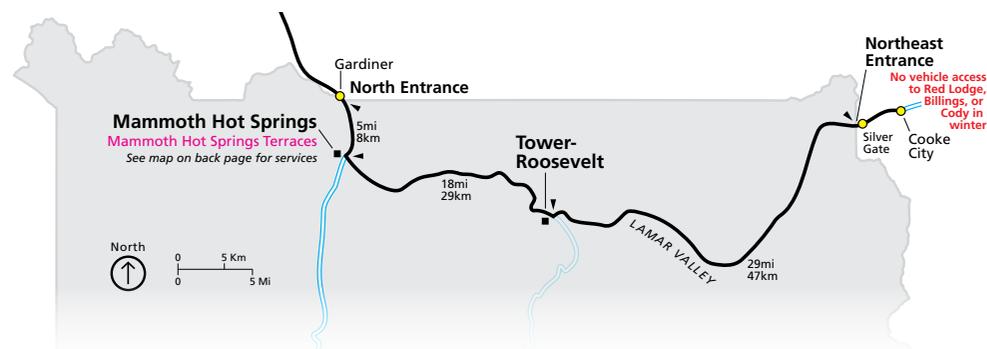

A wolf pack photographed from a plane during a wolf study.

# Reachable by Road

YELLOWSTONE IN WINTER IS WILD and remote due to seasonal changes in road conditions and access.

**Most park roads are closed to regular vehicles.** The only exception: the road between the North and Northeast entrances, which is open to regular traffic all year. (The road is closed beyond Cooke City, Montana.)

**Other park roads are open only to limited snowmobile and snowcoach travel.** The only way to visit Old Faithful, the Grand Canyon of the Yellowstone, and other popular destinations is by guided snowmobile or snowcoach (see pages two and six) or through the non-commercially guided snowmobile access program (see page six).

# Experience Mammoth Hot Springs

## Travertine Terraces

WINTER IS AN AMAZING TIME TO EXPLORE the terraces of Mammoth Hot Springs. Hot water steams in the cold winter air while ice and snow accentuate the beautiful shapes of these living sculptures.

**Four factors come together to create the terraces:**

- **Water**  
Rain and snow falling on the surrounding mountains seeps deep into the earth.
- **Heat**  
The water is then heated by underground volcanic heat. The exact source of the heat is unknown! (Scientists have proposed two sources: the large magma chamber underlying the heart of the park or a smaller source closer to Mammoth.)
- **Fractures and fissures**  
A network of fractures and fissures (cracks) acts like plumbing. The very hot underground water travels through the cracks to reach the surface.
- **Limestone**  
Limestone was deposited millions of years ago when a vast sea covered the area. The hot water travels up through the limestone via the fractures and fissures, carrying high amounts of dissolved carbonate minerals. At the surface, carbon dioxide is released, and carbonate minerals like calcite are deposited, forming travertine, the chalky white rock of the terraces.

### Stay On Boardwalks

and designated trails. Do not touch any thermal features and keep all objects out of springs. To avoid slips and falls, use caution on ice and snow.

#### EXPLORE BY FOOT

**Boardwalks** provide access to the lower area of Mammoth Hot Springs.

#### EXPLORE BY SKIS OR SNOWSHOES

**The Upper Terrace Loop Ski Trail** can be reached by personal vehicle via the Upper Terrace parking area. This groomed 1.5 mile (2.4 km) loop ranges from easy to more difficult due to a steep downhill section if traveled to the right (counter-clockwise) from the trailhead.

It is easiest if skied beginning to the left (clockwise). A moderate climb leads to views of hot springs, terraces, the Mammoth Hot Springs Historic District, and the surrounding mountains. At the top of the climb, a trail veers off to the southwest, which connects with the Snow Pass Trail. The Terrace Loop Trail descends past more hot springs before completing the circuit. Since snow is less deep than in the mountains above, wintering elk and deer are occasionally seen.

## Fort Yellowstone

THE UNITED STATES ESTABLISHED Yellowstone National Park in 1872. For the next decade, the park was under threat. Poachers killed animals. Souvenir hunters broke large pieces off of the geysers and hot springs. Developers set up camps for tourists. The park turned to the US Army for help.

In 1886, men from Company M, First US Cavalry, Fort Custer, Montana Territory came to Yellowstone under the command of Captain Moses Harris. They began what would be 32 years of military presence.

The buildings of Fort Yellowstone are a testament to the long history of our first national park and of the important role the Army played. Most buildings constructed during the Army era are still standing and are currently used by the National Park Service as park headquarters and employee housing.

Overlooking the boardwalks near Canary Spring.

# Drive the Northern Range

THE 52 MILES (84 KM) OF ROAD BETWEEN THE North and Northeast entrances travel through the Northern Range, the hub of wildlife in Yellowstone National Park. Occupying just ten percent of the park, it is winter range for the biggest elk herd in Yellowstone and is arguably the most carnivore-rich area in North America.

It is also the only area of the park that can be reached by automobile year-round, providing incredible opportunities to observe wildlife in winter—when they are often more active and easier to spot—as well as view beautiful winter scenery.

Looking out over a Northern Range valley, you could see bison, elk, pronghorn, mule deer, wolves, and more all interacting with each other.

If you choose to venture out into this winter wonderland, remember:

- **Watch out for wildlife on or near roadways.**
- **Do not feed any wildlife**, including small mammals and birds.
- **Check road and weather conditions locally or online before you depart** (see back page).
- **Drive cautiously.** The park speed limit is 45 mph (72 kph) unless posted slower. Icy and wet road conditions require extra attention and lower speeds.
- **Don't rely on your cell phone.** There is almost no cell service once you leave the Mammoth area. In case of emergency, there is a phone booth between the restrooms and gas station at Tower-Roosevelt.

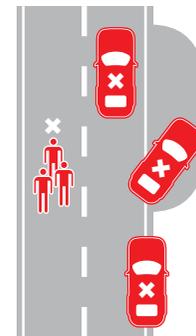

Wolf (*Canis lupus*)

**Safe Parking**

**Unsafe Parking**

Stopping, parking, or standing in the road is dangerous. Snow plows have limited visibility. Stay aware of traffic at all times.

- Use pullouts to stop.
- Park with all four tires fully to the right of the white line.
- When your vehicle is moving, keep doors closed and arms, cameras, and children inside.
- Do not stop your vehicle in the road or block traffic in any way.
- Do not stand in the road or block it with tripods, chairs, or other objects.
- If wildlife are nearby, stay inside your vehicle.

## Photograph Wildlife

YELLOWSTONE IS ONE OF THE BEST PLACES in the world to view—and photograph—wildlife in their natural habitat. Professional photographers share these tips for capturing the best shots while respecting and protecting park wildlife.

### The Name of the Game is Patience

To get the best shot, you will spend more time waiting and observing than taking photos. Look for patterns in animal behavior that can help you get a great shot. You may have to wait a while, so be ready.

### Know Your Camera's Limits

A cell phone camera will not be able to capture the same resolution and detail as a more advanced standalone camera with large lenses. Good photography isn't about getting close to the animal for a close-up. It's about having the right equipment for the job.

### Widen Your Perspective

Try to capture the character of the environment around wildlife, too. Habitat says a lot and will increase your chances of capturing interactions between a variety of animals.

### Work the "Golden Hours"

Animals are most active in the early morning and late afternoon or evening. Luckily, these are also the hours of the day with the most dramatic light.

## Stay Safe Behind and in Front of the Camera

An unusual vantage point can add drama to your image, but you don't want to add the drama of a hospital visit to your trip. **Never sacrifice safety for a photograph.**

### Be Aware of Your Surroundings

Stay behind fences and guard rails. Never turn your back on wild animals.

### Keep Children Close to You at All Times

Never try to pose them with wildlife.

### Stay Out of the Road

Do not stop your vehicle in the road or stand in the roadway. Do not block any portion of the road with tripods, chairs, or other objects. Do not block the free flow of traffic.

A winter photography group.

# Ski and Snowshoe

YELLOWSTONE OFFERS A VARIETY OF ENJOYABLE, challenging skiing and snowshoeing trails. Track is set on a few trails, others may be groomed, and all unplowed roads and trails are open to skiing and snowshoeing.

**Equipment rental** is available in nearby communities. **Ski shop services**, including lessons, rentals, and repairs, are available at the Bear Den Ski Shops at Mammoth Hot Springs and Old Faithful Snow Lodge.

**Brochures** with general trail maps and descriptions are at warming huts and ski shops. **One-way or round-trip skier shuttles** may be offered to specific trails in the park for a fee.

## DRESS FOR SUCCESS

Even in Yellowstone's severe winter temperatures, you can be comfortable and safe if you prevent chilling and overheating by wearing the right clothes.

- **Wear several adjustable layers** including wind protection and insulated undergarments.
- **Avoid clothes that are too tight.** They restrict circulation and increase the chance of frostbite.
- **Do not wear cotton clothes of any kind**, including jeans, sweatshirts, underwear, or socks. They retain moisture and put you at risk of hypothermia.

Cross-country skiers on the Bunsen Peak Road Ski Trail.

## ETIQUETTE

- **Do not walk on snowshoe or ski trails.**
- **Snowshoe parallel to the ski track.**
- **Yield to faster skiers or those going downhill.**
- **Detour around wildlife. Do not approach.**

**For detailed information** on winter trails, routes, and safety, contact the Central Backcountry Office (307-344-2160) or request a Winter Backcountry Trip Planner (available online or at visitor centers).

## Authorized Guides

MANY AUTHORIZED GUIDES AND **outfitters** are ready to show you Yellowstone's wonders, and each has a unique approach. Find authorized guides, tour companies, or other commercial services at [go.nps.gov/YELLtours](http://go.nps.gov/YELLtours).

**Report unauthorized operators** to a park ranger or contact Concessions Management at 307-344-2271.

### Special use permits are required for certain activities

including organized gatherings like weddings or church services, public assemblies and demonstrations, some commercial activities like commercial travel, and some types of filming and photography. For more information, call 307-344-2722.

YELLOWSTONE NATIONAL PARK IS assisted in fulfilling our mission by our official non-profit partner, **Yellowstone Forever**. Proceeds from Yellowstone Forever educational bookstores, Institute, and philanthropic efforts support priority park projects and visitor education.

Find more information:

- Visit [Yellowstone.org](http://Yellowstone.org)
- Call 406-848-2400

**The Yellowstone Forever Institute** introduces thousands of students to the park's natural wonders. Programs range from one day to three weeks and highlight the park's amazing wildlife, hydrothermal areas, rich history, and awe-inspiring wilderness.

Programs are perfect for curious adults and families who want to explore the park with a knowledgeable guide.

Visit [Yellowstone.org](http://Yellowstone.org) to view the course catalog and register.

## Self-Guided Snowmobiling

VISITORS INTERESTED IN GUIDING a **small, one-to-three day, private (not commercial) snowmobile trip** through Yellowstone in winter can find details and apply online at [recreation.gov](http://recreation.gov).

Permit holders are considered non-commercial guides and may lead groups of up to five snowmobiles. All snowmobile operators must be licensed (including the permit holders) and must complete the free, online Yellowstone Snowmobile Education Certification course.

Beginning October 1, unclaimed or canceled permits can be obtained with a first-come, first-served reservation through [recreation.gov](http://recreation.gov).

For more information, visit [go.nps.gov/ncgsap](http://go.nps.gov/ncgsap).

N-CGSAP stands for Non-Commercially Guided Snowmobile Access Program.

# Wild in Winter

Hayden Valley in winter.

AS REMARKABLE AS YELLOWSTONE IS DURING the rest of the year, in winter the park is a magical place: steam and boiling water erupt from natural cauldrons in the park's ice-covered surface, snow-dusted bison exhale vaporous breaths as they lumber through drifts of white, foxes and coyotes paw and pounce in their search for prey in the deep snow, and gray wolves bay beneath the frozen moon.

## WINTER ADAPTATIONS

Yellowstone in winter is also a place of vulnerability. Wildlife endure extremes of cold, wind, and the absence of ready food. Park conditions in this most severe of seasons become a matter of life and death. To survive, plants and animals are forced to adapt.

Here are some adaptations you can mimic to more comfortably and safely enjoy your winter visit:

- Deer, elk, and bison sometimes follow each other through deep snow to save energy. *When skiing and snowshoeing through fresh snow, take turns breaking trail.*
- Mammals molt their fur in late spring to early summer. Incoming guard hairs are longer and protect their underfur. Additional underfur grows each fall and is made of short, thick, often wavy hairs designed to trap air. A sebaceous (oil) gland, adjacent to each

hair canal, secretes oil to waterproof the fur. Mammals have muscular control of their fur, fluffing it up to trap air when they are cold and sleeking it down to remove air when they are warm. *Wear multiple layers, including wind and waterproof outerwear, to adjust to changing conditions.*

- Snowshoe hares have large feet to spread their weight over the snow. Martens and lynx grow additional fur between their toes to give them effectively larger feet. *Increase the surface area of your feet with skis or snowshoes.*

## WINTER SOUNDSCAPES

Yellowstone's soundscape is the total of all the sounds within the park, including those that can't be heard by human ears. Some sounds are critical for animals to locate a mate or food or to avoid predators. Others, such as those produced by weather, water, and hydrothermal activity, may be a result rather than a cause of ecological processes.

Human-caused sounds can mask the natural soundscape. The National Park Service's goal is to protect or restore natural soundscapes where possible and to minimize human-caused sounds while recognizing that they are generally more appropriate in and near developed areas.

Human-caused sounds that mask the natural soundscape are, to some extent, unavoidable in and near developed areas. However, the potential for frequent and pervasive high-decibel noise from oversnow vehicles has made the winter soundscape an issue of particular concern in Yellowstone.

*Every now and then, turn off any engines or music. Listen to the sounds of winter. What do you hear? How do the sounds around you impact your experience?*

## CLIMATE CHANGE

In Yellowstone, scientists expect ecosystems to change due to increased temperatures and changing rain and snow patterns. Some observed and expected effects of climate change include:

- Average temperatures are higher now than they were 50 years ago, especially during spring.
- Snowpack throughout the area is decreasing and snow is melting faster in the spring. This could impact agriculture and municipal water supplies downstream.
- The alpine zone may shift higher, decreasing or eliminating species that live in this important habitat.

*How might warmer temperatures affect the winter scenes that surround you?*

# Surviving Winter's Edge

BISON ARE ICONIC ANIMALS OF THE AMERICAN West and, with adult males weighing up to 2,000 pounds (900 kg), the largest land mammal in North America. The herd is made up of cows, calves, and some younger bulls. Mature bulls spend most of the year alone or with other bulls, except during the rut (mating season).

Bison are well-adapted to Yellowstone winters. Their thick fur and layers of fat keep them insulated in average low temperatures of  $-30^{\circ}\text{F}$  ( $-34^{\circ}\text{C}$ ). Their massive humps are made of muscles supported by long vertebrae and are used like snowplows, swinging side to side to sweep away the snow and uncover grasses and sedges underneath.

Despite these adaptations, bison (and other wildlife) in winter have limited energy reserves. **Help protect bison and yourself by always staying at least 25 yards (23 m) away.**

## Bison or Buffalo?

In North America, both "bison" and "buffalo" refer to the American bison (*Bison bison*). Generally, "buffalo" is used informally, while "bison" is preferred for formal or scientific purposes.

Early European explorers called this animal by many names. Historians believe that the term "buffalo" grew from the French word for beef, *boeuf*.

American bison are a different genus than other buffalo in the world.

Bison  
(*Bison bison*)

# Rules and Regulations

## Drones

Launching, landing, or operating unmanned aircraft (drones) on lands and waters administered by the National Park Service is prohibited.

## Camping

Camping is allowed only in designated campsites. No overnight camping is allowed in pull-outs, parking areas, picnic grounds, or any place other than a designated campground. Additional camping may be available in neighboring communities. Overnight backcountry camping is allowed in designated sites and requires a permit.

## Swimming

Swimming in hot springs is always illegal and is extremely dangerous. Obey swimming and wading closures where marked.

## Firearms

Firearms are allowed in national parks pursuant to state and federal regulations. They are prohibited in facilities where signs are posted, such as visitor centers, government offices, and some concession operations. Discharge of firearms is prohibited. Possession and use of weapons, such as air guns, bows and arrows, spears, and slingshots, is also prohibited. Details are available at [go.nps.gov/yell-laws](http://go.nps.gov/yell-laws).

## Smoking

Smoking is prohibited in geyser basins, on trails, in buildings, or within 25 feet of building entrances.

## Side Mirrors

Detachable side mirrors must be removed when not pulling a trailer.

## Wildlife

For the safety of wildlife and yourself, the following are prohibited and carry legal penalties, including fines:

- Remaining near or approaching wildlife within **any distance** that disturbs or displaces the animal
- Spotting wildlife (viewing with lights)
- Imitating elk calls or using buglers
- Imitating wolf howls
- Tracking wildlife with electronic equipment

## Leave No Trace

Take only pictures. It is illegal to remove or possess natural or cultural resources such as wildflowers, antlers, rocks, and arrowheads.

**This is only a partial list of regulations. For more information,** consult 36 Code of Federal Regulations and the Superintendent's Compendium, available at [go.nps.gov/yell-laws](http://go.nps.gov/yell-laws).

## Store Food Securely

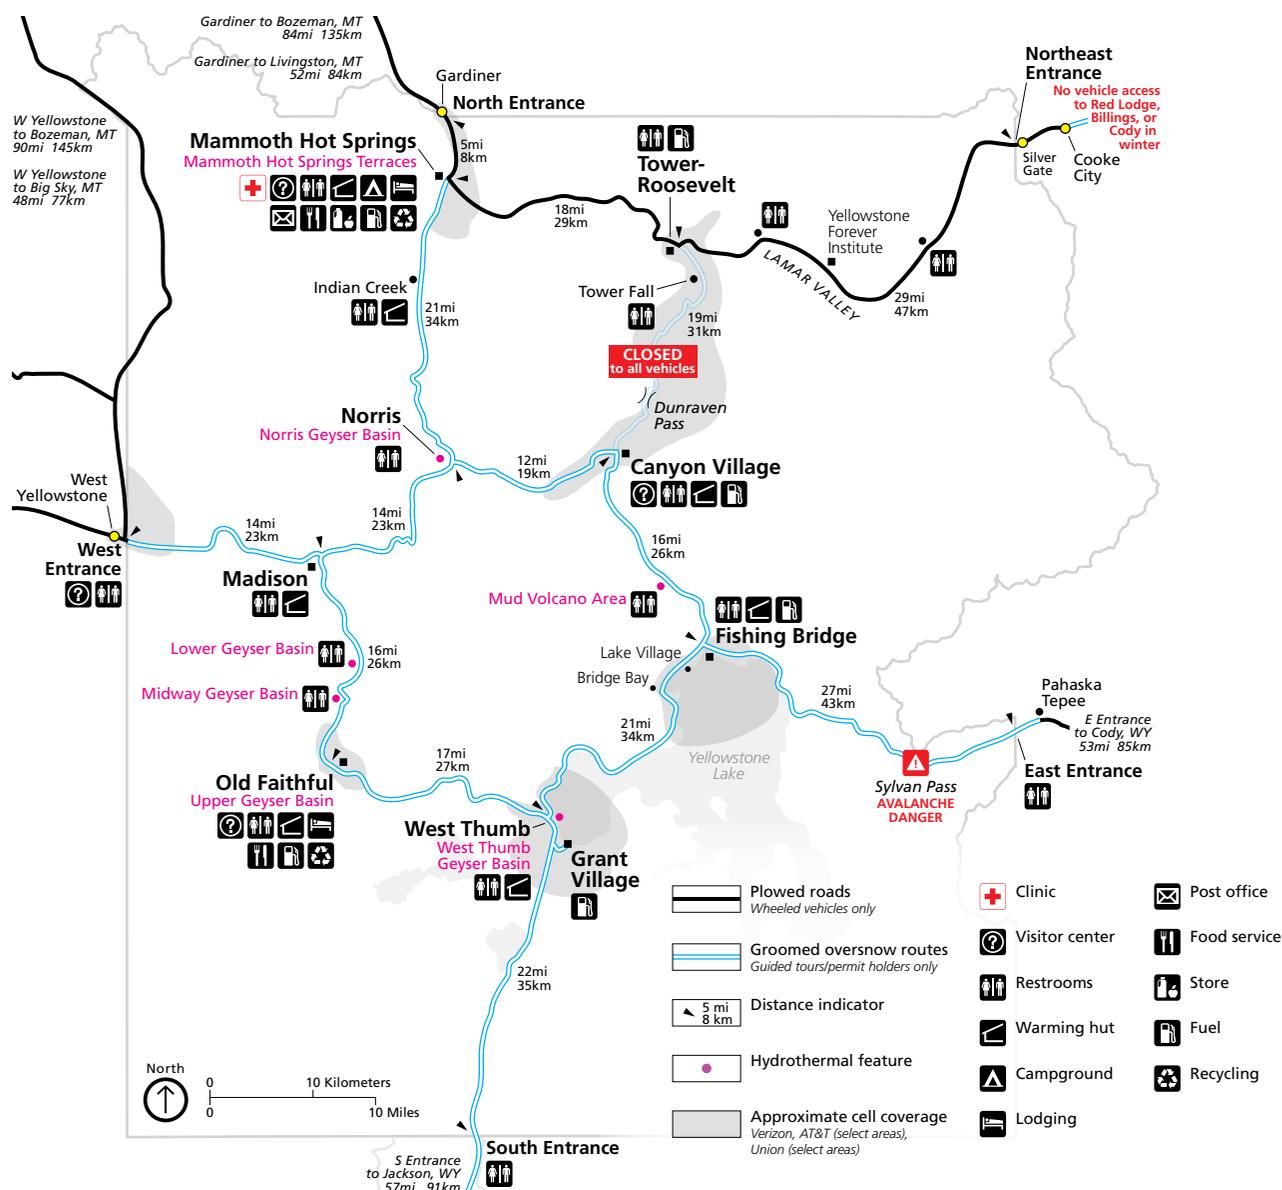

**Do not feed any wildlife,** including small mammals and birds. Eating human food is unhealthy and encourages aggressive behavior that may require animals to be destroyed.

All food, trash, and scented items must be kept inaccessible to wildlife at all times. Tents, truck beds, and picnic tables are not secure. In some areas, ravens have learned to unzip packs and scatter the contents.

None of these items, even if clean and empty, may be left unattended at any time:

- Water and beverage containers
- Cooking or eating utensils
- Stoves and grills
- Coolers and ice chests
- Garbage, bagged or not
- Food, including condiments even if in containers
- Cosmetics and toiletries
- Pet food and bowls
- Pails, buckets, and wash basins

# Park Roads

## Road Status Updates

**Hotline** 307-344-2117  
**Online** [go.nps.gov/YELLroads](http://go.nps.gov/YELLroads)  
**Mobile alerts** text 82190 to 888-777

## Drive Cautiously

The park speed limit is 45 mph (72 kph) unless posted slower. Icy and wet roads require extra attention.

Watch for wildlife on or near roadways.

Keep the road clear at all times, even when watching wildlife. Don't stop, stand, or walk in the road. Use a pullout if you need to stop for any reason.

## Oversnow Travel End Dates

**March 6, 9pm** Mammoth to Norris Junction  
**March 8, 9pm** Madison to Norris to Canyon  
**March 13, 9pm** Canyon to Fishing Bridge  
**March 15, 9pm** East Entrance to Lake Butte Overlook (Sylvan Pass)  
 Remaining groomed roads

## Spring Road Opening 2022

**Year-Round** North Entrance to Northeast Entrance  
**April 15, 8am** Mammoth to Old Faithful; Madison to West Entrance; Norris to Canyon  
**May 6, 8am** Canyon to Lake; Lake to East Entrance (Sylvan Pass)  
**May 13, 8am** West Thumb to Old Faithful; Lake to S Entrance; Tower Jct to Tower Fall  
**May 27, 8am** Tower Fall to Canyon; Beartooth Highway
